THE VENOMOUS ABYSS · HEROIC · FINAL BOSS

Ula'tek, Heroic

Pull review: Monday 26 October 2026

12	6.5%	6 of 12	28.5 pts
pulls, 20:41 to 22:51, all wipes	best pull (#7): into the enrage, 606 s	pulls reached the fourth platform (none did on 21 Oct)	closer than 21 Oct: the best pull went from 35.0% to 6.5%

The short version

- **You are at the last minute.** The fourth platform breaks at about 594 s and Fury Unleashed follows at 599 s, so the third Heart window, from 574 s to 594 s, is the kill window. Tonight's best pull went into it at 12.8% with 11 alive. #5 went in at 18.7% with 15 alive. One had the health and the other had the bodies, and neither had both.
- **The fixes from 21 October held.** Blight Vein never went past 4 stacks (it reached 6 and wiped two pulls last time). There were 0 opening Rattler Slams (there were 4). 42 Potions of Recklessness went into the first Heart window (there were 6). 78 of 84 Serpent's Bite circles held.
- **Heart targeting got worse, and worst where it matters most.** 80% of targeted casts in the first window went at the Heart (85% on 21 Oct), 79% in the second (81%), and **56% in the third**, the only window that can end the fight.
- **Avoidable damage rose, mostly because you lived longer.** Per 10 minutes alive, Stage One went from 2.1 to 2.7 hits (worse), Stage Two from 3.7 to 2.9 (better), and Stage Three from 7.0 to 7.5, but you spent nearly four times as long in it. Caustic Waves was the killing blow 21 times.

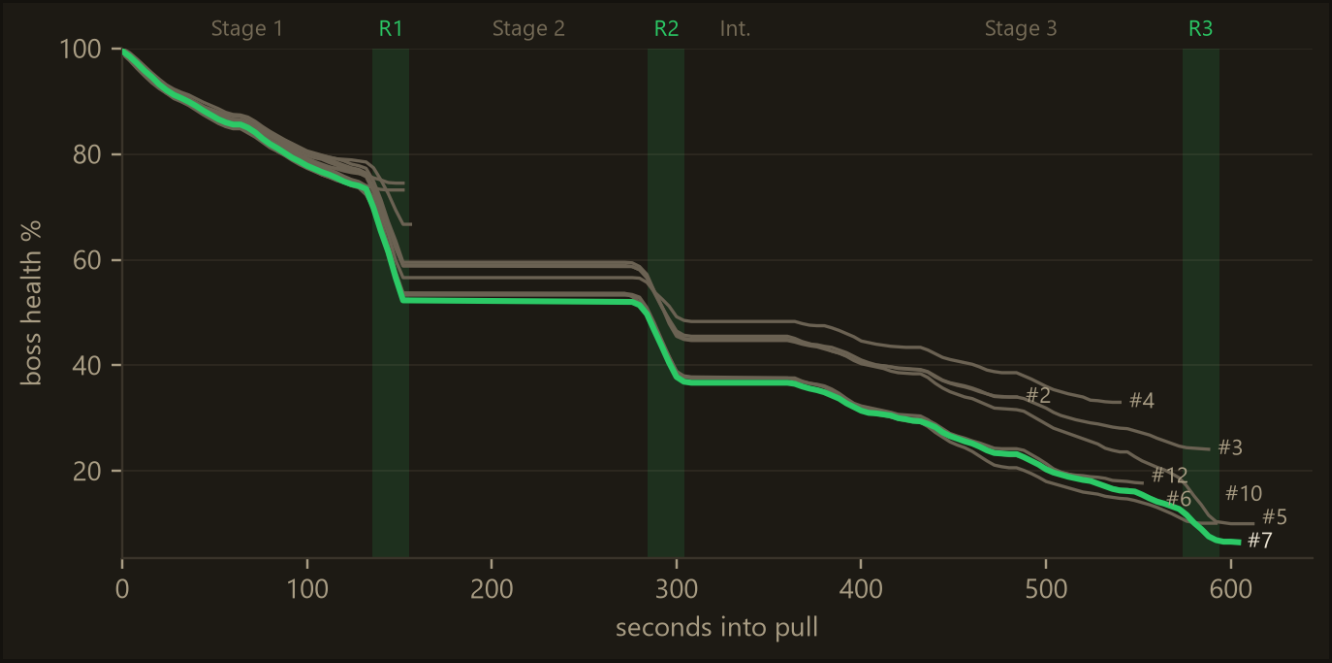

FIX THESE FIRST

1. Everyone on the Heart in the third window: a focus or target macro, and no cleave-only rotations on the body. **2.** Kill Shriekers like #5 did. Its three died in 26–36 s, and nobody died between the intermission and the fourth bite. **3.** At the end of the second window (304 s) Parmageddon taunts her from melee before Hyperxd moves. That is where 4 of 13 Unchecked Rages happened. **4.** Bite carriers live: an external or a defensive on each mark, because a carrier who dies becomes the corpse.

SECTION 1

How the night went

Same fight, same clock: the Heart opens at 135.5 s, 284.5 s and, new tonight because you got there, 573.7 s on the fourth platform. 8 of 12 pulls reached Stage Three and 6 reached the fourth platform. Two ran into the enrage.

Ula'tek's health over time; the best pull (#7) is highlighted, and the shaded bands are the three Heart windows. The third only exists for a raid that reaches the fourth platform.

Two nights, side by side

	21 OCT	TONIGHT
Pulls	10	12
Best pull	35.0% (#8)	6.5% (#7)
Reached Stage Three	4	8
Reached the fourth platform	0	6
Reached the enrage	0	2
Lowest boss health entering Stage Three	44.1%	36.7%
First Heart window, average boss health removed	16.4%	18.3%
Second Heart window, average	10.9%	12.7%
Targeted casts on the Heart, all windows	84%	78%
Worst Blight Vein stack	6	4
Opening Rattler Slams	4	0
Unchecked Rage events	7	13
Serpent's Bite circles held	18 of 21	78 of 84
Potions in the first Heart window	6	42
Vipers hatched in Stage One	17	20

	21 OCT	TONIGHT
Avoidable hits per 10 min alive	3.1	4.2

Heart-window averages leave out pulls that wiped inside the window. Tonight's first four pulls were seventeen players, which raises her health by about 6%; every percentage here is of the health she had in that pull.

Every wipe, and what ended it

PULL	LENGTH	WIPED IN	HP	WHAT ENDED IT
#1	275 s	Stage 2	66.7%	One of the two Doomscale Eggs was never delivered. Its 90-second clock ran out at 254 s, the Ravenous Doomscale hatched, and Dread Roar stunned and killed the raid at 266 s. Four Vipers had already hatched in Stage One.
#2	488 s	Stage 3 · platform 2	34.0%	Lili, carrying the second Serpent's Bite, died to a Caustic Wave at 475 s. The carrier became the Calcified Corpse and the raid died within three seconds.
#3	591 s	Stage 3 · Heart window 3	24.1%	The three Shriekers lived 34–41 s and Acidic Expulsion did 79M; eight died between 480 and 529 s. The fourth bite's Elladale circle had two helpers and failed inside the third window.
#4	544 s	Stage 3 · platform 3	33.0%	A Vicious Echoes went through at 527.5 s and stunned the raid under Acidic Expulsion: nine deaths at 527–529 s. The second pair of Shriekers never died.
#5	614 s	Stage 3 · final break	10.0%	The cleanest pull: Shriekers dead in 26–36 s and nobody lost until the third window. In at 18.7%, out at 10.4%; the final platform break killed ten at 594 s and Fury Unleashed took the rest.
#6	564 s	Stage 3 · platform 4	14.4%	Nine died between 418 and 528 s (Volatile Purge, Caustic Waves, the second Shrieker pair). Then Pawsey was killed outright by the fourth bite's own hit at 562 s, and each Calcified Corpse took the next carrier with it: the raid was gone by 564 s.
#7	606 s	Stage 3 · Heart window 3	6.5%	Best pull. In to the third window at 12.8% but with eleven alive, then more deaths inside it. Out at 6.9%, then the final break and Fury Unleashed.
#8	155 s	Stage 1 · Heart window	73.2%	Two Vipers hatched at 106–110 s. Hyperxd died holding her at 129 s, which fired Unchecked Rage, and Rage of the Shackled finished a low raid inside the first Heart window.
#9	153 s	Stage 1 · Heart window	74.5%	Rattler Slam at 77 s after the tail lost Hyperxd, two Vipers at 106–108 s, and Rage of the Shackled finished a low raid at 144 s.
#10	593 s	Stage 3 · Heart window 3	10.1%	Into the third window at 11.2% with ten alive. Predz, carrying the fourth bite, died to Acidic Expulsion at 574 s; the corpse ended it a second later.
#11	120 s	Stage 1	77.3%	Eight Vipers hatched at 109–118 s. Mother's Wrath then marked Hyperxd 26 yd from her, out of reach, and every bite went raid-wide at 119 s.
#12	554 s	Stage 3 · platform 3	17.7%	Unchecked Rage at 501 and 507 s, Hyperxd 43 yd away and Parmageddon in reach without aggro, for 14M. The second Shrieker pair never died and the raid fell at 550–554 s.

SECTION 2

Are people hitting the Heart?

Less than on 21 October, and least in the window that matters. The Heart still takes double damage (the same player's same spell hit it **2.02×** harder than the body, over 313 player-spell pairs), so every global on the body in a window is half a global. Tonight there was a third window, and it decides the kill.

WINDOW	OPENS	HEART SHARE, 21 OCT	HEART SHARE, TONIGHT	BOSS HEALTH REMOVED, TONIGHT
First	135.5 s	85%	80%	18.3% average
Second	284.5 s	81%	79%	12.7% average
Third	573.7 s	—	**56%**	#3 0.5%, #5 5.5%, #7 4.0%, #10 1.1%

Share of each player's targeted casts, all three windows together. Measured from what each cast was aimed at, not where the damage landed, so cleave onto the body is not counted as a mistake. Anyone with fewer than 20 targeted casts in the windows is left out.

The third window

Four pulls reached it. In 43 of 44 player-windows the player stood closer to the Heart than to her centre, so reach was not the problem. Players who aimed at least as many casts at the body as at the Heart in a third window: **Hyperxd** (2 of 4), **Raziiel** (2 of 4), **Littlemel** (1 of 4), **Scitolock** (1 of 4) and **Vurve** (1 of 4).

PULL	BOSS HEALTH ENTERING	ALIVE ENTERING	HEART SHARE IN THE WINDOW	BOSS HEALTH AT 594 S	HOW IT ENDED
#3	24.7%	10	28%	24.1%	Raid collapsing; fourth bite failed inside the window
#5	18.7%	15	55%	10.4%	Survived the window, killed by the final break

PULL	BOSS HEALTH ENTERING	ALIVE ENTERING	HEART SHARE IN THE WINDOW	BOSS HEALTH AT 594 S	HOW IT ENDED
#7	12.8%	11	66%	6.9%	Survived the window with six, enrage
#10	11.2%	10	65%	10.1%	Fourth-bite carrier died; corpse wipe

WHAT THIS IS WORTH

In #5 the body took 1.3% of her health in single-target hits during the third window. Moved onto the Heart, that is about 1.3% more, which on its own does not close a 10% gap. Targeting is one lever of three: arrive with more people (section 4), arrive lower, and then spend the window on the Heart. #7 arrived at 12.8% and needed all of it from the window. With 11 alive going in and 6 at the end, it found 5.9%.

Across the night

- **4 of 17** players put 90% or more of their targeted casts on the Heart (it was 10 of 15). Lowest among DPS: Nestle 2%, Littlemel 51%, Pawsey 59% and Raziiel 70%.
- **Windows spent mostly on the body**, tonight: Littlemel 7, Hyperxd 6, Pawsey 6, Raziiel 4 and Nestle 3.
- **Nestle** (Beast Mastery, four pulls) aimed 40 of 41 targeted casts at the body. Hunter pets follow the hunter's target, so the pet went too.
- **Hyperxd at 59%** is still the tank holding her through the windows. Parmageddon is at 91%.

Potions: the advice landed

42 Potions of Recklessness went into the first window tonight, against 6 on 21 October, and 11 more into the third window. Still never drunk, in any pull: Elladale, Hyperxd, Lili, Littlemel, Mishamigo, Nestle, Pawsey, Raya and Scitolock.

SECTION 3

Avoidable damage

The same definition as on 21 October: **Caustic Waves**, **Virulent Spit**, **Falling Debris**, **Deadly Venom** pools and **Desperate Thrash** on a non-tank, counted per hit (absorbed hits included), normalised by time alive. The fair comparison between the nights is by stage, because tonight spent far longer in the hardest one.

STAGE	21 OCT, PER 10 MIN ALIVE	TONIGHT	TIME ALIVE, 21 OCT	TONIGHT
Stage 1	2.1	2.7	347 player-min	432 player-min
Stage 2	3.7	2.9	202 player-min	304 player-min
Stage 3	7.0	7.5	102 player-min	378 player-min

	#1 275s	#2 488s	#3 591s	#4 544s	#5 614s	#6 564s	#7 606s	#8 155s	#9 153s	#10 593s	#11 121s	#12 554s
Hyperxd	4	8	11	7	11	11	11	1	2	14	1	6
Parmageddon	7	5	7	3	7	7	12	2	3	7	4	4
Mishamigo	3	6	6	3	4	3	4	2	3	4	3	3
Predz	1	2	5	8	7	3	3	2	1	5	2	5
Elladale	2	4	6	6	7	3	5	1	·	3	1	3
Pawsey	3	5	4	2	·	4	7	1	2	3	2	2
Littlemel	1	4	4	4	5	1	2	3	1	2	1	2
Lili	·	3	1	5	4	3	4	1	1	4	1	2
Raziiel	2	2	3	2	1	4	4	1	·	4	2	3
Raya	·	·	5	3	3	3	1	1	1	4	1	3
Vurve	2	2	2	6	2	1	1	2	1	3	2	1
Fartshart	1	2	4	1	4	3	2	1	2	2	1	·
Abyssia	·	1	·	1	3	2	4	·	4	2	2	2
Blackscale	·	1	2	2	4	1	·	3	1	2	1	2
Hunikel	·	·	·	2	2	1	5	1	1	2	2	1
Scitolock	·	1	2	·	4	1	1	·	2	2	1	1
Nestle	2	1	2	3	–	–	–	–	–	–	–	–

Personal avoidable hits per player per pull. A dot means none; a dash means the player was not in the raid for that pull.

Top offenders, and the trend

PLAYER	ROLE	HITS	PER 10 MIN ALIVE	21 OCT	CHANGE	PER PULL (MEAN ± SD)
Hyperxd	tank	87	10.2	10.9	-0.7	7.2 ± 4.3
Parmageddon	tank	68	7.8	7.3	+0.5	5.7 ± 2.6
Nestle	dps	8	5.8	new	—	2.0 ± 0.7
Predz	dps	44	5.2	3.0	+2.2	3.7 ± 2.2
Mishamigo	healer	44	5.0	1.6	+3.5	3.7 ± 1.2
Pawsey	dps	35	4.8	4.0	+0.7	2.9 ± 1.8
Elladale	dps	41	4.8	2.4	+2.3	3.4 ± 2.1
Littlemel	dps	30	3.6	2.5	+1.1	2.5 ± 1.4
Lili	dps	29	3.6	2.3	+1.3	2.4 ± 1.6
Raziiel	dps	28	3.4	new	—	2.3 ± 1.2
Vurve	dps	25	3.4	1.7	+1.7	2.1 ± 1.3
Raya	healer	25	3.0	2.4	+0.5	2.1 ± 1.6
Fartshart	healer	23	2.8	3.3	-0.5	1.9 ± 1.2
Abyssia	dps	21	2.6	2.1	+0.5	1.8 ± 1.4
Blackscale	dps	19	2.2	1.4	+0.8	1.6 ± 1.1
Hunikel	dps	17	2.0	0.8	+1.2	1.4 ± 1.3
Scitolock	dps	15	1.8	1.8	+0.1	1.2 ± 1.1

How to read it

- **Caustic Waves is the problem now.** 266 hits and 264M of damage, against 101 on 21 October, and the killing blow 21 times. By Stage Three a wave is close to lethal on its own. Most hit: Parmageddon 35, Mishamigo 30, Hyperxd 25 and Elladale 25.
- **Deadly Venom pools** went from 58 exposures to 173, nearly all of them in Stage Three, where platforms fill with venom and Volatile Purge raises the damage it does. Most exposed: Hyperxd 31, Predz 22, Parmageddon 16 and Pawsey 11.
- **Stage One got worse**, and it is the stage you play twelve times a night. Two pulls stand out: #11 (13 hits) and #1 (12 hits).
- **The tanks still top the table**, for the same positional reason as last time. Among everyone else the biggest risers since 21 October are Mishamigo (1.6 → 5.0), Elladale (2.4 → 4.8) and Predz (3.0 → 5.2).

By mechanic

MECHANIC	HITS	DAMAGE	MOST HIT
Caustic Waves	266	263.8M	Parmageddon 35, Mishamigo 30, Hyperxd 25, Elladale 25
Virulent Spit	49	19.0M	Hyperxd 14, Mishamigo 6, Raziiel 6, Parmageddon 4
Falling Debris	63	21.6M	Hyperxd 17, Parmageddon 13, Pawsey 5, Littlemel 5
Deadly Venom (pool)	173	28.2M	Hyperxd 31, Predz 22, Parmageddon 16, Pawsey 11
Desperate Thrash (non-tank)	8	4.1M	Lili 2, Predz 2, Raziiel 2, Raya 1
Call of the Serpent (landing) (soft)	38	12.3M	Hyperxd 10, Pawsey 6, Raya 4, Lili 4
Warden's Protection (soft)	61	5.4M	Hyperxd 15, Hunikel 10, Fartshart 7, Elladale 4

SECTION 4

What is ending pulls now

Last time it was Blight Vein chains, short bite circles and tank hand-offs. The first is gone, the second has a new cause, and the third has moved to a new time. Stage Three attrition is the new wall.

Stage Three attrition: the Shriekers

One Blightscale Shrieker arrives at about 450 s and two more at about 512 s. Their Acidic Expulsion cannot be interrupted and hits everyone, so the only lever is how long they live. The fastest kill of the night was also the only pull that lost nobody in Stage Three before the wipe:

PULL	FIRST SHRIEKER LIVED	SECOND PAIR LIVED	ACIDIC EXPULSION DAMAGE	STAGE THREE DEATHS BEFORE THE WIPE	VICIOUS ECHOES THROUGH
#2	22 s	—	8M	2	—
#3	37 s	40 s, 33 s	79M	8	—
#4	39 s	never died, never died	49M	11	528 s
#5	35 s	29 s, 26 s	39M	0	—
#6	38 s	39 s, 39 s	40M	9	—
#7	36 s	39 s, 39 s	52M	5	—
#10	33 s	47 s, 42 s	50M	6	—
#12	40 s	never died, never died	23M	9	529 s

Vicious Echoes is the Shrieker cast that CAN be kicked; it stuns for 6 s. In #4 the one that went through at 527.5 s was followed by nine deaths in two seconds.

Serpent's Bite: carriers who die

78 of 84 circles held tonight, and every one that held collected 21 or more helper ticks. The failures changed character from 21 October: most were not short circles, they were **carriers who died**. A carrier who dies holding the venom becomes the Calcified Corpse, and on Heroic that ends the pull.

PULL · BITE	CARRIER	HELPER TICKS	WHAT HAPPENED
#2 · 2nd	Lili	23	Died to a Caustic Wave mid-bite.
#3 · 4th	Elladale	19	Two helpers. Genuinely short.
#6 · 4th	Littlemel	6	Killed by Pawsey's corpse, two seconds in.
#6 · 4th	Mishamigo	1	Killed by the corpse chain, three seconds in.
#6 · 4th	Pawsey	0	Killed outright by the bite's own hit, one second in.
#10 · 4th	Predz	26	Died to Acidic Expulsion mid-bite.

THE FIX

Treat the three marks as the three most important players alive for fifteen seconds: an external on each, personals ready, and nobody carrying a mark into a wave. The reserve rule from last time still stands for circles short of helpers.

Unchecked Rage moved to 308 seconds

13 Unchecked Rages tonight against 7 on 21 October, but they cluster in two places. **4 came at 305–312 s**, right after the second Heart window closes: Hyperxd still held her from 30–40 yd away while Parmageddon stood in reach (11–16 yd) without aggro. **3 came at 36–44 s**, the first hand-off, with Hyperxd 28–29 yd out.

PULL	WHEN	HER TARGET	HYPERXD FROM HER	PARMAGEDDON FROM HER
#1	41.3 s	Hyperxd	29 yd	47 yd
#2	308.3 s	Hyperxd	31 yd	14 yd
#3	308.5 s	Hyperxd	40 yd	11 yd
#3	394.8 s	Hyperxd	30 yd	16 yd
#7	308.7 s	Hyperxd	33 yd	16 yd
#8	128.8 s	Hyperxd	15 yd	53 yd
#10	93.5 s	Parmageddon	17 yd	37 yd
#10	308.8 s	Hyperxd	30 yd	15 yd
#11	39.9 s	Hyperxd	28 yd	17 yd
#11	70.2 s	Parmageddon	36 yd	31 yd
#12	41.0 s	Hyperxd	28 yd	18 yd
#12	500.7 s	Hyperxd	44 yd	11 yd
#12	506.8 s	Hyperxd	43 yd	11 yd

Distances are measured from her centre; the tank holding her in melee reads about 15 yd. Positions come from the log and can lag a moving player by a second.

THE FIX

The rule from last time, applied at two named moments. **When the second window closes, Parmageddon taunts her from melee before Hyperxd moves.** At the first hand-off (about 38 s), the same order: the incoming tank is in reach and taunting before the outgoing one leaves.

Stage One: Vipers

An egg that touches venom hatches a Viper, and every Viper hatched sprays Putrid Membrane over the whole raid. 20 Vipers hatched in Stage One tonight (17 on 21 October). The two short pulls that died in the first Heart window, #8 and #9, each lost two, and #11 lost eight.

PULL	VIPERS IN STAGE ONE	PUTRID MEMBRANE DAMAGE
#1	4	30.1M
#2	1	6.4M
#4	2	19.3M
#5	1	6.0M
#8	2	12.4M
#9	2	12.1M
#11	8	8.8M

Next raid night, in order

1. **The third window is the kill.** Everyone on the Heart, potions and cooldowns held for it, and Hyperxd, Raziiel, Littlemel and Scitolock specifically checking their target when it opens.
2. **Shriekers die in about 35 seconds or less.** #5 did it and lost nobody before the fourth bite. Kick every Vicious Echoes.
3. **Parmageddon taunts at 304 s**, from melee, as the second window closes; the same order at the 38 s hand-off.
4. **Bite carriers get an external and stay out of waves.** A carrier who dies is a wipe.
5. **Caustic Waves.** 266 hits and 21 deaths. The back set on Heroic is the one that catches people.
6. **Stage One eggs.** No egg into venom; #11 died to eight Vipers before the first window.

Method and caveats

Source: the in-game combat log (advanced logging, build 12.1.5), 12 encounters of Ula'tek (encounter 3492), Heroic, 17 players across the night (seventeen for the first four pulls, then sixteen). Parsed by tools/logs/ulatek.py in this repository, the same script that now produces the 21 October review, so the two nights are measured identically.

Pulls are written #1–#12. Warcraft Logs writes its phases as P1–P3, and they are the stages here: Stage One (P1), Stage Two (P2), Stage Three (P3). The intermission between the last two belongs to neither. Inside a stage the review slices time further, at each Heart window and each platform break, because the damage rate changes at every one of them.

Boss health is read per pull, because it scales with raid size (874M at sixteen, 930M at seventeen). Alive counts include battle resurrections. Serpent's Bite helper ticks are assigned to the nearest carrier by position. Shrieker lifetimes run from the first event naming the add to its death.
